SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

Product contains no hazardous ingredients in reportable quantities under the following jurisdictions: USA, Canada, European Union, Australia, New Zealand, Japan, Korea, South Africa, or the UN.

Additional Information - Non-Hazardous ingredients are not listed as confidential and proprietary and make up the totality of the product.

SECTION 4: FIRST AID MEASURES

Description of first aid measures

Note: First aid recommendations are predicated on exposure to product that has not been previously exposed to radioactive isotopes. For ANY EXPOSURE to product that has been used to decontaminate surfaces with measured or suspected radioactivity, medical attention should be sought.

Inhalation	Remove patient from exposure. Keep patient at rest and give oxygen if breathing difficult. If symptoms develop (unusual occurrence), obtain medical attention.
Skin Contact	Simply wash affected areas with soap and water. In the highly unusual event of persistent irritation, seek medical assistance.
Eye Contact	Remove any contact lenses. Irrigate with eyewash solution or clean water, holding the eyelids apart, for at least 15 minutes. Obtain medical attention for persistent irritation.
Ingestion	Do not induce vomiting. Make victim drink plenty of water. Ingestion of small amounts (< 60 ml or 2.0 fl. oz.) should not require medical treatment, provided that the product has not collected radioisotopes.

Most important symptoms and effects, both acute and delayed

Acute: May cause irritation to stomach and esophagus upon ingestion. May cause mild to moderate eye irritation.
Delayed and chronic effects: Similar to acute effects. Any delayed and/or chronic effects will generally be due to radioactive materials dissolved in solution post-use.

Indication of the immediate medical attention and special treatment needed

Most exposures require no treatment, provided that the solution does not contain radioactive substances collected from use. In cases where radiation exposure is suspected, it is critical that exposures be reported and carefully monitored for symptoms consistent with radiation-induced illnesses.

Special Hazards

A self contained breathing apparatus and suitable protective clothing should be worn in fire conditions.

Advice for fire-fighters

For fires in which used solution is involved, radiological monitoring is essential. Launder contaminated protective devices.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	Ensure full personal protection (including respiratory protection) during removal of spillages. Evacuate if necessary. If used solution is spilled, expert assistance may be needed due to release of radiation.
Environmental Precautions	Radiological monitoring of spill site is essential where used solution has been spilled. Product poses no chemical hazards to the environment.
Methods and material for containment and cleaning up	Absorb material in inert absorbent and transfer to a lidded container for disposal or recovery. For solutions that may have radioisotopes, storage containers must be appropriately marked and type-accepted for the purpose of storing radiological waste; consult with manufacturer or authorities to ensure compliance.
