- Dimensions 22.8 (w) x 7.09 (h) x 1.06 in. (d)

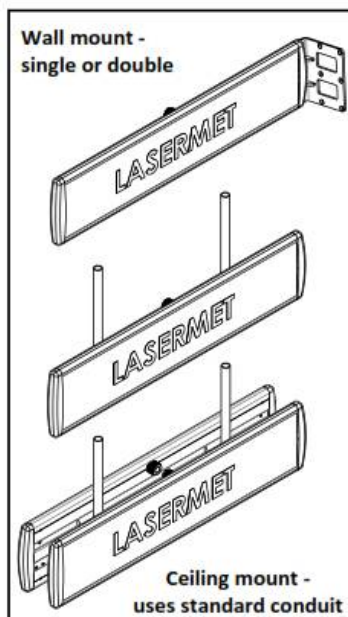

The **Ultra 580 IP66** is an LED sign designed for outside use. It is IP66 rated to BS60529 which means that the sign is protected against powerful water jets and is dust-tight - ideal for use in the wind and rain.

The high-brightness LEDs ensure the sign is readable in strong sunlight.

Other options (to be ordering) include auto or remote dimming and an on/off flashing

Also a number of mounting bracket options are available for either single facing or dual facing signs, in addition to direct wall mounting.

The sign is tested to BS EN IEC 60529 Standard IP66 which means that it prevents the ingress of dust and prevents the ingress of water when subjected to powerful water jets.

The Ultra range of LED signs are available in many colors—the most popular being red and green.

Dual message signs show one message in red and then another in green. All messages are secret until lit.
